

Jackets against bad weather conditions often have a design which is unfavourable for sports - something which does not apply to this protective jacket. A light-weight 2-layer model with napped mesh lining, marked contrasting tapes, water-proof and breathable.

We have designed the jacket with an ergonomic ladies' cut which envelopes your body in an optimum fashion.

Moreover, you benefit from adjustable sleeve cuffs, an additional pocket in the lower sleeve and a front zipper covered in the collar area.
