

This shirt will accompany you in all your outdoor activities starting from the cooler days of early autumn. Its ergonomic cut and its high elasticity ensure unparalleled comfort: this is what we call "TAO-Comfort-Plus". Its breathable material, napped on the inside, generates a perfect microclimate during sport activities which is enhanced by its wicking and fast-drying effect. The collar style protects the neck thanks to its snug fit, and the covered zipper puller cannot scratch. A reflector-enhanced asymmetric pocket on the front means that you can take small items along.
